WHOLE-SYSTEM CARE

- **SOFTWARE MANAGEMENT**
  Always up to date, never a hassle.

- **HARDWARE UPDATES**
  Devices that scale with your business.

- **PROACTIVE TESTING**
  Ongoing monitoring and benchmarking means our experts are out in front of potential problems.

PROTECT, MANAGE & GROW YOUR CITRIX SYSTEM. AND YOUR BUSINESS.

The myriad moving parts inherent to a successful Citrix infrastructure are diverse and fragile — change a 1 to a 0 and boom! Users throw their hands up in despair; productivity tumbles. And keeping your data secure and accessible only to the right people can be a sleep-defeater. You've taken an important step in selecting Citrix to manage your IT infascrtucture. Now, consider whether you have the right people managing your Citrix system. Your in-house team is brilliant; they jump on IT fires every day and keep the systems running. But are they Citrix experts? Are they getting the most out of your Citrix system? Consider extending your team with veterans who understand Citrix at a core level. Who understand how Citrix works as a part of your overall system. Who understand the critcal nature of your data. Whitehat Virtual Technologies has developed proprietary tools and technicques that find and fix network problems before you even know a problem exists. Years of real-world Citrix experience make us an unparalleled IT partner. Let us focus on the IT, while you focus on the business.
